Costs

Cost of evaluation and treatments is based on several factors: anatomical area, size of the area being treated, number of treatments required, and whether intense pulsed light and/or laser is required. Also, it may be that microdermabrasion is offered as part of the treatment for the best results. With dermal fillers, the amount of product must be determined.

Each patient and treatment plan is unique, requiring individual assessment for pricing purposes. Allow us the opportunity to consult with you to tailor a treatment and payment plan that meets your specific needs. The cost of the initial physician consultation for non-medical problems is \$75. Cost of the treatments, packages, or a variety of combinations thereof, varies, starting at \$250. If your condition should be diagnosed as medical, our office manager will discuss insurance billing possibilities with you.

Consultation is required to evaluate your condition and give you the recommendations and the options for your particular problem or concern. This allows us to grade your skin and specifically program your individual characteristics to create your unique profile. A skin test may be utilized at this consultation so that certain problems may be treated at this appointment. Others may require multiple and/or combined treatments for optimal results. Package treatments often give the best results as they can expand on a specific treatment for an enhanced overall effect. All of this will be discussed with you at your initial consultation as we work together to qualify your expectations and provide you with the best possible result.

Payment Policies

Strictly cosmetic procedures are payable at time of service. Insurance coverage varies depending on the type of problem. Many dermatological conditions are medical and thus are billable to insurance. As with all insurances we encourage you to understand your plan coverage. We will assist you, once you are evaluated, with the intended procedure and diagnosis codes. Financing, however, is also available through Care Credit (with a zero finance charge option). Payment for non-billed services, co-pays, etc., are due at the time of service. VISA, MasterCard and Care Credit are accepted.
