## Permanent Make-Up (Cosmetic Tattooing)

You can get the look you always desired with permanent make-up. This procedure can also be called cosmetic tattooing. The pigment of your choice can be implanted beneath the epidermis of the skin. The pigment will stay there permanently but will fade a little and may require touch ups so it looks better. Generally speaking in a few weeks you will see the actual color which then can be preserved for many years.

Permanent make-up will create a more youthful, finished, less tired look. It can also save time for those who want to have a new look without having to reapply makeup daily. The makeup is derived from vegetable products, and the length of procedures varies, but on an average our nurse specialists take about 1/2-1 hour. On the initial visit, you will be evaluated and given an allergy test. You will also have the opportunity to leaf through a portfolio of pictures of Marina's clients.

Marina Belenky, permanent make-up artist, has more then 10 years of experience and is well recognized for her attention to detail. She has a background as a certified nurse but also education in art and design. She enhances client's features but does not overpower them. Marina is dedicated to making clients feel comfortable when they come and looking beautiful when they leave.

### Permanent Eyebrows

Eyebrows frame your eyes and give certain expression to your face. Your eyebrows can become fuller and be more defined. Sparse eyebrows can be filled with strokes of color.

### Permanent Lipline and Lip Color

Correct all the imperfections of uneven lips. Make them more defined and camouflage raggedy lines. It can make the mouth appear fuller and minimize the appearance of raggedy wrinkles as well.
